

Spider Announces Postmaster Conversion to a Subscription-Only Service

Spider Networks Ltd. today announces that its consumer and small business webmail service has converted to a subscription Gold service.

London, August 14, 2007 - Spider Networks, the power behind interactive web communications, today converts its free webmail service to a subscription Gold service. Spider's Gold service now has more storage, spam has been reduced, the user interface is cleaner as there will be no more advertising clutter, new applications are available and the service is faster than ever.

Spider's Postmaster product has been voted 'simply the best' by WebUser magazine and has enabled over a half million users to manage their email online. Postmaster is a fully hosted webmail service with a 2GB spam-free inbox, IMAP and POP 3 support allowing users to access their emails via a traditional PC, virus filtering, an array of spam controls, calendars, address books, file storage, a simple point and click website builder, vibrant discussion forums, polls and news feeds. All for only £14.99 a year.

Postmaster has recently been upgraded with a new look & feel and a cleaner user interface, the console has been updated and many of the pages have been simplified to make the user experience easier. Spider intends to continuously improve Postmaster and they will soon be announcing new optional features which include photo albums, shared family mailboxes and much more.

"We have had a great response from our users with many upgrading to our Gold service over the last few months," says Jim Conroy, managing director, Spider Networks Ltd. "We are committed to providing the best subscription product on the market with many new features soon to come."

To sign up for the Postmaster suite of services go to www.postmaster.co.uk.
