

Wrexham LEA Decides to Use Spider's WebHosting

Wrexham LEA, part of the Welsh National Grid for Learning Cymru decides to utilize Spider Networks to host many of their school websites

London, August 14, 2007 - Spider Networks Ltd, a leading provider of school communication portals and ePortfolios for LEAs and schools in the UK, today announces that Wrexham LEA will have Spider Networks host many of their school websites.

Spider Networks has been working in partnership with Wrexham LEA over the last 7 years to meet their online learning objectives. All of Wrexham's 98 schools have access to a customized learning portal providing a wealth of applications. A homepage for all the schools announcements, access to RSS feeds and Ticker Tapes keeps everyone informed of all the school's activity. A secure school webmail, file storage, contacts, calendar, website builder, discussion forums, chat and a collaborative area for a myriad of communities of interest provides for a stimulating school online environment.

"Utilising Spider's ability to host our schools' websites is a logical extension of our long-term partnership," says Dave Green , ICT Coordinator. "Each of our schools can now update their websites as well as using Edukit, Spider's learning environment."

About Spider Networks

Based in the UK, Spider Networks is the power behind interactive web communications. From one integrated online environment, over 650,000 users in the school, business, ISP and consumer markets use Spider's technology to better communicate and interact dynamically within an organisation and beyond.
