

Spider Networks Announces Another Upgrade to Edukit, Their School Learning Platform

Spider Networks, the leader in on demand collaborative services with over 1 million users worldwide today announces another significant upgrade to their Learning Platform, Edukit

London, March 3, 2009 – Spider Networks is pleased to announce two new applications to Edukit; Photo Albums and Video Albums. Edukit is a web-based learning platform developed over the last 10 years with input from leading education authorities and schools in the UK. With over 400 schools using Edukit the Spider team regularly asks for feedback on new applications or features that would improve the school communications experience.

“Our schools were asking for a robust media solution which would allow students and teachers to upload and store Photo Albums and Video Albums to be used as both learning tools and just for fun”, says Jim Conroy, managing director of Spider Networks. “We have delivered on their request.”

With the ever growing popularity of digital cameras and camcorders, there are many students and teachers who are looking to put their photographs and educational videos online. Edukit users can now create photo and video albums, share photos and videos with fellow students, teachers and friends. Administrators can now insert a video via the announcements on the homepage.

Edukit's new photo and video album applications are now part of the navigation bar on the homepage for all users. There are a number of practical features to enhance your user experience:

- Simple wizard interface allows you to build your own albums quickly and easily
- Create albums for all, or just for a group of people - the choice is up to you, you can mix and match how you like

- Attach a descriptive text to each image
- Upload single images or many at a time
- You can attach many pictures or videos to an album, or create multiple albums with a selection from your library
- Quick page viewing using thumbnails
- Allow your viewers to see a complete slideshow of your album
- Choose from a wide variety of background images/themes for your albums
- Send your photos and videos to others via an email
- Other users have the ability to report abuse to the Administrator
- Administrators have the ability to delete abusive users from using the applications

Edukit, Spider's full Managed Learning Environment provides a range of communication, collaboration and publishing tools to allow academic members to teach, learn and work online. All services are provided in a hosted environment, and all members are directly managed by local administrators in the school or LEA. Advanced access controls allow the interaction between members to be conducted in the most secure environment possible.

About Spider Networks

Based in the UK, Spider Networks is the power behind interactive web communications. From one integrated online environment, over 1 million users in the school, business, association, ISP and consumer markets use Spider's technology to better communicate and interact dynamically within an organisation and beyond.
